Product Vision	Project Mission
With the increase of data exchange between organizational / domain level such as finance, legal, healthcare, government, etcy the need of ease of data interoperability while still adhering to data usage, policies, and compliance to local legalisations is becoming significant. Dataspace is the envisioned solutions to tackle these challenges.	Explore the feasibiltiy of dataspace usage with regards to data sovereignty. This includes the testing the maturity of dataspace, which components are important and ease of deployment
